INTRODUCTION

Dear User,

Thank you for purchasing our appliance and for your reliance upon our company. Our appliances are used in professional kitchens in 100 countries.

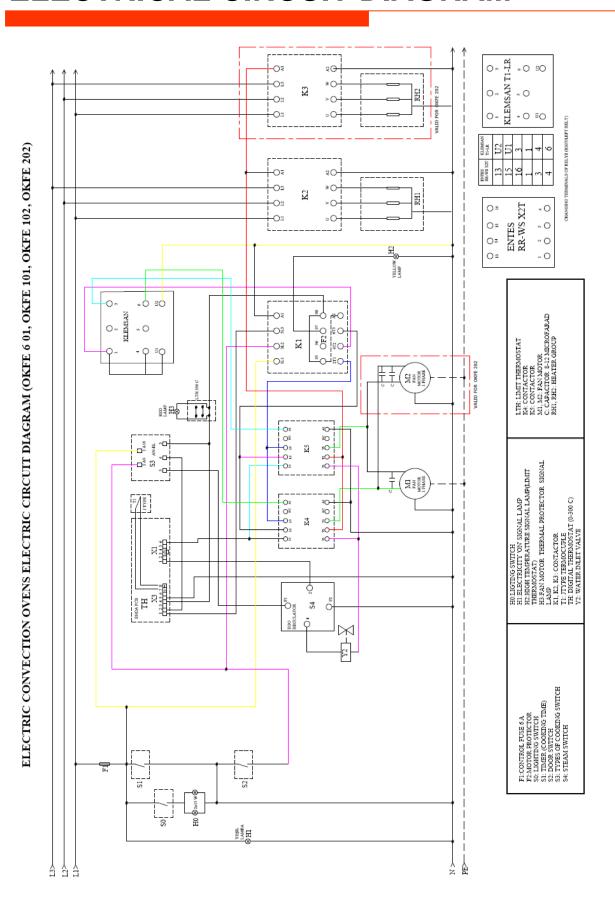

Our appliances are produced in compliance with international standards. Important notice: Please read and ensure that the users read this user's manual in order to achieve the desired performance in line with your expectations and to use your appliance for long years. Please take the warnings mentioned above into consideration before calling for service...

- Please read and ensure that your operation personnel also reads this user's manual care fully before installing and using the appliance. If the appliance is operated without reading the user's manual, the appliance will not be covered by the warranty.
- The manual containing information about installation, usage and maintenance of our product you purchased should be read carefully. Please ensure that power supply connections to the appliance are already installed by qualified personnel according to local legislation, before our authorized service personnel arrives for the installation of the appliance.
- If you are confused or you don't have enough information please get in touch with authorized service by phone.
- Please keep in mind that, if the service personnel is delayed at your site, related expenses and delay costs will be charged to you on hourly basis.
- We hope that you will get the best performance from our product...

SAFETY DETAILS

The device should only be operated under a chimney hood.

Any kind of flammable solid and liquid material (cloths, alcohol and derivatives, petrochemical products, wooden and plastic materials, cutting blocks, curtains etc.) should never be held near the appliance.

For You can use this appliance simultaneously together with other products of ours.

- □ Do not clean up the appliance with pressure water
- This appliance should be installed in line with effective regulations and only be operated in well ventilated places. Please refer to the instructions before installing and operating the appliance.

This appliance is designed for industrial use and should only be operated by personnel trained on the appliance.

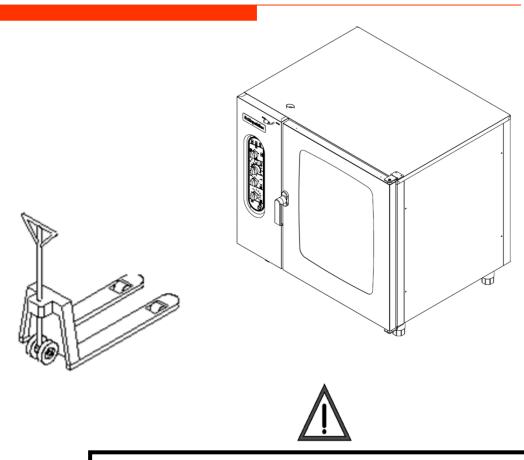

- In case of fire or flame in the area where the appliance is operated, act without panic, close gas valves, turn off the power switches and use a fire extinguisher. Never use water to extinguish the fire.
- Before first ever use of the appliance, an odor may be created because of isolation material and heater elements. Therefore before initial use, set all thermostats to the temperature 250 °C and operate the appliance empty for 45 minutes.

TRANSPORTING AND MOVING

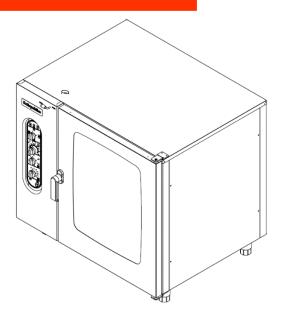

CHANGING THE LOCATION;

Machines installed by an authorized service CANNOT BE MOVED ELSEWHERE, ITS POWER SUPPLY CABLES CANNOT BE EXTENDED OR REPLACED except by an authorized service.

- The device should be placed vertically on a palette with man power.
- Feet of the fork lift should be placed under the appliance.
- If the transported distance is far, the machine should be moved slowly and the appliance should be fixed on palette or supported in order to prevent jolt.
- Do not hit or drop the product when moving.

INSTALLATION OF THE APPLIANCE

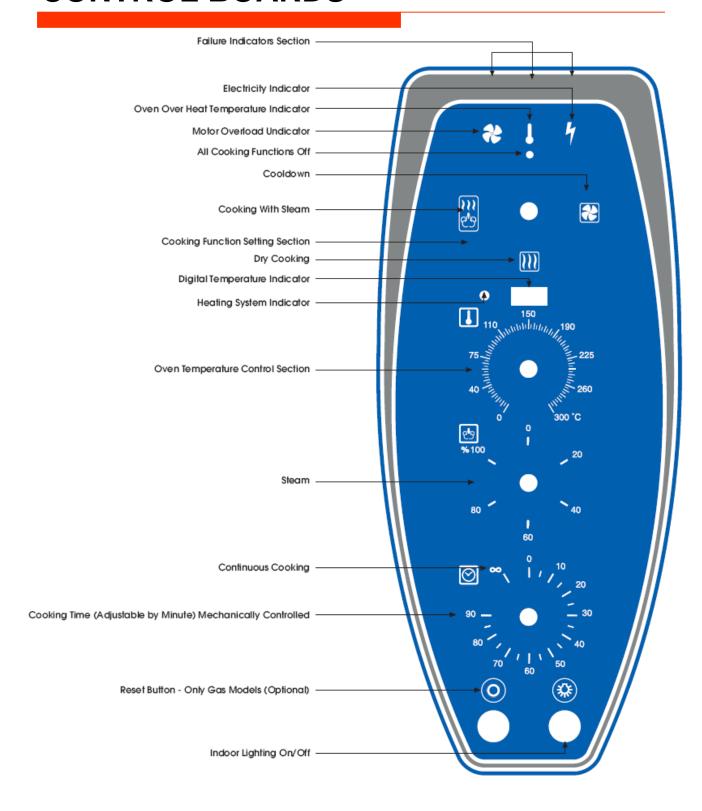

If this appliance located near to any wall, separation, kitchen furniture, decorative coating etc. the distance in between should be min.50 cm. and if those are coated with fireproof heat insulating material, the distance should be min.10 cm. It is strongly recommended that fire safety protection instructions are observed.

All of the items mentioned below in connection with the installation of the appliance should be carried out by authorized service personnel.

- Workbench on which the appliance stands should be adjusted and the appliance should be ensured to operate in a leveled position.
- Power supply connection of the appliance should be checked by an eligible electrician, and it should be connected to a fuse at a maximum height of 170 cm.
- Power supply connection should be made using a 30 mA current leakage fuse as a protection against current leakage danger.
- Power installation to be used should be grounded by connecting it to a grounding bar at the nearest panel.

CONTROL BOARDS

OPERATION OF THE APPLIANCE

- 1. Oven is used in kitchens of restaurants, fast food stands, canteens.
- 2. Before initial use of the appliance, the outer surface should be wiped with a cloth soaked in warm water and soap.

NOTE: Do not use except purpose of use. The appliance should be operated by qualified personnel knowing safety terms and technical specifications and who has read the instruction manual.

<u>CAUTION !</u> <u>NEVER OPERATE YOUR DEVICE</u> WITHOUT GROUND CONNECTION.

- Turn the on-off key on once you prefer to operate with steam or steamless.
- Before first ever use of the appliance, an odor may be created because of isolation material and heater elements. Therefore before initial use, set all thermostats to the temperature 250 °C and operate the appliance empty for 45 minutes.
- Set the oven thermostat for preheating to any degree between 250-300°C operating temperature (Green lamp will light).
- Place the foods to be baked into the device after the disappears. Cooking period depends on food type.
- Using the key turn on the light to check whether baking of the food is completed.
- Once cooking is completed open the door and take out the foods.
- Turn the commutator to "0" position after daily use. Disconnect the appliance from the power supply. Clean up the appliance after disconnecting it from the power supply.
- It is recommended to operate the appliance between temperatures of +5°C +40°C and in ambient humidity of maximum 65%.

OPERATION OF THE APPLIANCE

<u>CAUTION!</u>: The appliances should be installed and operated as described in this user's manual. If any failure is encountered please contact our nearest authorized service dealer.

NEVER ALLOW PEOPLE WHO ARE NOT AUTHORIZED TO HANDLE THE APPLIANCES. OTHERWISE PRODUCER COMPANY WILL NOT BE RESPONSIBLE FOR THE CONSEQUENCES. DURING MAINTENANCE SERVICE OUR AUTHORIZED SERVICE DEALERS SHOULD NOT BE PROPOSED TO USE NON-ORIGINAL SPARE PARTS FOR WHATSOEVER. INSTALLING ANY NON-ORIGINAL SPARE PART TO THE APPLIANCE LEAVES THE APPLIANCE OUT OF WARRANTY COVERAGE.

CLEAN-UP AND MAINTENANCE

1. CLEAN-UP: (To be implemented by consumer)

Clean up the appliance after disconnecting from power supply.

Wait for the appliance to cool down before clean up.

Check out the inner of the oven before and after each operation of the appliance, that no material is left within.

Clean burnt and hardened food residuals in the oven.

Wipe the inner parts of the oven with a cloth soaked in warm water and soap.

Then wipe again with a wet cloth and wipe dry later.

Pay attention to residuals of unlicensed cleaning agents, because they may evaporate during heating and may harm food stuff inside the oven.

Hood glasses may be cleaned up with glass cleaning agents without leaving any residuals.

Outer surfaces of the appliance may be cleaned up using non-porous industrial cleaning agents, which do not scratch metal surfaces, without leaving any residuals Do not use CHEMICAL CLEANING AGENTS like hydrochloric acid or abrasive cleaning agents.

2. MAINTENANCE:

Periodic maintenance should be carried out by a technician. It is recommended to carry out maintenance at least every 6 months, depending on the frequency of use. Periodic maintenance conducted by authorized service personnel of ours is charged, even the guarantee period has not expired.

LIFE OF USE

Appliances life of use is 10 year if it is used under recommended conditions.
