

A close-up photograph of a black waffle maker. The top surface is a flat, black cooking plate with several rows of waffle-shaped indentations. In the center-right area, a row of seven golden-brown, rectangular waffles is cooking. To the left, another row of waffles is partially visible. The waffles have a porous, textured appearance. The waffle maker is mounted on a stainless steel base, with a silver-colored metal leg visible in the lower right. The entire image is framed by a thick red border.
